IN "IMATION EYE-SIGHT."

M. N. LAZARUS,
Optician, of London and Calcutta, may
be consulted for SPECTACLES at
FLETCHER & CO.'S PHARMACY,
(Opposite the Hongkong Hotel).
Business Hours: 9 a.m. to 5 p.m.

A great proportion of cutbacks and disease affecting those advancing in life occur to those having some deficiency in the protection of the eye. The "Eye-Sight" is a speciality in various forms of disease. Glasses specially adapted to youth in those requiring them save and preserve the sight.

Constantly reassuring households, spells of disease, while reading, weak eyes, the letters, writing together, any of these symptoms indicate a deficiency in the form of the eye requiring Glasses only to correct the sight.

Mr. LAZARUS supplies his SPECTACLES only after testing the sight.

ADVICE FREE [2639]

"vices of our own countrymen. If, for instance, the working classes have nearly as much bread and sugar, tea and tobacco as they want, very urgently, and prefer to expend their growing real income in larger proportions on better nutrition, more holidays at the seaside, better and larger education, more sports, and sporting news, their choice is their own. A sage might suggest a little improvement here and there, but on the balance there seems no great matter for regret." This is cheerful, certainly, and happily, the argument may to some extent be supported by unascertained facts. A country, like a merchant, must appraise the value of its business, not on the gross turn-over, but on the profit remaining at the annual stock-taking, and the British Budget compares favourably with those of the Continental nations. The steady reduction in the amount of our national debt is not indicative of commercial decadence, nor can the increase in the debts of several of the Continental nations be taken, exactly as a sign of prosperity. This optimistic view of the case must not, however, be allowed to blind us to the threatening nature of the competition to which we are exposed. It is not by bounties and subsidies alone that the trade of foreign nations has been built up, but by the introduction of improved methods and higher standards. As Professor MARSHALL says at the close of our letter, "though the broad figures of our foreign trade may give no just cause for alarm, there are many details which seem disquieting. That nation leads in trade, not which has the largest exports, but which puts into them the greatest amount of mind and energy and the least amount of proportionately of crude labour. Our exports, no doubt, carry with them more mind than they ever did. But some other countries have been working their minds perhaps harder than we have; and it may be that, in comparison with them, our exports contain relatively less mind than they did earlier in the century." This point has for some time past been making itself felt in Great Britain and various schemes for the improvement of commercial and technical education have been set-on-foot. As another step in the same direction it is now proposed to establish a National Physical Laboratory, which, it is suggested, might render the same services to British industry as the Physikalisch-technische Reichsanstalt at Charlottenburg does to that of Germany or the Paris Bureau International des Poids et Mesures that of France.

Captain Tschirch was sentenced to imprisonment for life by the U. S. Consular Court at Canton on Tuesday, was brought down to Hongkong in the *Zhongwei* on Wednesday, and yesterday he left for Shanghai in the *Nippon Maru*.

About noon yesterday a married woman living on the second floor of a Cantonese house was hanging out clothes on the veranda when she fell. The telephone wires broke but she was badly injured and her recovery is doubtful. She was taken to the Government Civil Hospital.

A Nanking dispatch states that Count de Beaufort has left Nanking for Wuhan instead of coming back to Shanghai as was at first surmised, and that Vice-Admiral Li, in consequence, sent "Total" name to Wuhan to apprise him of the movements of the French *Amirauté* in that vicinity. — *A. THE HONGKONG DISPENSARY.

ESTABLISHED 1841.

The work of clearing the ground on the west side of Glenelg for building operations was, we believe, to have commenced some days ago. The fact that no start has yet been made would rank the hope that steps are being taken to preserve this beautiful piece of land.

By all means, however, let us hope that the French *Amirauté* in that vicinity.

It is reported in official circles that H. E. Luk Chuen-lam, Governor-Designate of Canton, left Shanghai on the 11th instant for Canton.

The annual bombardment of Shantung by the Tatar-General and the two assistant Tatar-Generals took place on the 15th inst. and is to continue until the 27th instant. This is an ancient ceremonial usage, the best chance for the Tatar-General to make their squeezes, the firing of a few shots causing several thousand thousands of dollars.

It is reported that the Tatar-General has

sent a cablegram to the *Amirauté* in that

district, and the Tatar-General's post is

now in the hands of the Tatar-General.

The Tatar-General has issued a notice prohibiting the people of Shantung from

the owners of the steam-launches running

in the inland waters. It says that owners of

steam-launches should know that they have

to pay one hundred and fifty taels per

tael as a tollage per ton per quarter.

If the people of the inland waters are reported

by the owners of the steam-launches for

giving them trouble in trying to exact

the tollage, they will be severely dealt with.
